DETAILED ACTION

Elections/Restrictions

Applicant's election of Group I in the reply filed on 27 July 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 101

Claim Objections

Claims 3 and 4 objected to because of the following informalities: claim 3 is dependant in the alternative from claims 1 or 2 (2 has been restricted) and claim 4 is dependant from claim 3. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as anticipated by MULLER (US 5877200).

MULLER teaches:

1. A method of inhibiting TNF- α production (column 11 line 61)

which comprises contacting a cell which produces TNF- α with an effective amount of enantiomerically pure (+)-3-(3,4-dimethoxy-phenyl)-3-(1-oxo-1,3-dihydro-isoindol-2-yl)-propionamide, (column 11 lines 29-33 which teaches use of each individual isomers of disclosed compounds, including column 24 lines 22-23 where 3-(3,4-dimethoxy-phenyl)-3-(1-oxoisindolin-2-yl)propionamide and 3-(3,4-dimethoxy-phenyl)-3-(1-oxo-1,3-dihydro-isoindol-2-yl)-propionamide are the same compound)

or a pharmaceutically acceptable salt or solvate thereof (column 8 lines 48-56)

3. The method of claim 1 or 2 wherein the cell is a mammalian cell. (Claim 32 where in a "mammal" inherently means mammalian cells)

4. The method of claim 3 wherein the cell is a human cell. (column 1 line 22 where "administering to ... humans" inherently means human cells)
